Linear Equations

Question: Is 1 a solution to $3x + 4 = 7$? \underline{\text{why?}}

SIMPLE EQUATIONS:

- $X - 3 = 2$
- $-2 + X = 4$
- $-3X = 15$
- $\frac{X}{-2} = -3$

Try:

- $X + 7 = 2$
- $x - 5 = 4$
- $8X = 24$
- $-2 = \frac{X}{-7}$
